

What is Tutterra?

AI-POWERED P2P TUTORING

Tutterra is an AI-powered peer-to-peer tutoring app built for teens. The core idea is matching younger students (middle school, grades 6+) with older tutors from high school (grades 9+) within the same school district for one-on-one online STEM tutoring sessions.

Tutterra

Instagram & TikTok Branding Strategy

Building an Online Presence for the EdTech Generation

COMPANY OVERVIEW

PROBLEM

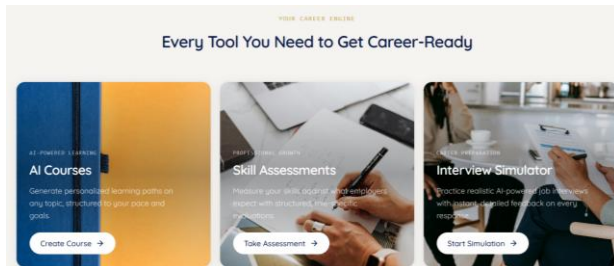

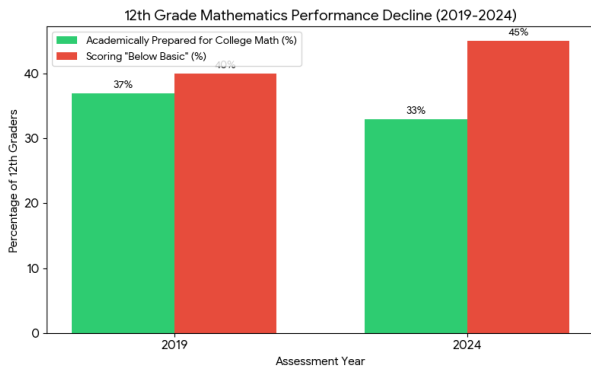

Schools struggle to help students close achievement gaps, especially in STEM subjects where peer mentorship is most effective.

PRODUCT

AI-powered P2P tutoring app matching middle schoolers (6th+) with high school tutors (9th+) in the same school district.

MISSION

Update student learning through organized, safe, interactive P2P tutoring allowing for high schoolers to earn volunteer hours or compensation.

Who We Serve

Students & Job Seekers

Students and working professionals eager to close the gap between what they've learned and what the world demands. Whether they're preparing for a job interview, building confidence in core subjects, or discovering their talents, Tuterra meets them where they are.

Educators & Institutions

Forward-thinking schools, educators, and ministries looking to integrate AI tools that reinforce classroom teaching, track performance, and make learning measurable and impactful.

Governments & Foundations

Stakeholders committed to scalable educational reform and youth employment. Tuterra provides data-driven insight and adaptable tools that support national development goals.

PROJECT

5 Core Goals

01

Brand Awareness

Increase Tutterra's visibility and recognition among teens across Instagram & TikTok

02

Engage & Educate

Share valuable, fun content covering STEM trends, P2P learning, and EdTech insights

03

Connect with Stakeholders

Participate in discussions with teens and influencers around education & technology

04

Highlight Success Stories

Share case studies, testimonials, and pilot program outcomes to demonstrate impact

05

Drive Growth

Reach 500+ followers per platform, 500 total interactions, convert 30-50 to ambassadors

CONTENT STRATEGY

INSTAGRAM

- ▶ Target: 1,500 followers
- ▶ Post frequency: 3x per week minimum
- ▶ Use influencers following for outreach
- ▶ Mix of feed posts and reel posts
- ▶ Case studies & testimonials: 2-3/month
- ▶ Visual infographics: 5-6 per month
- ▶ Participate in giveaways for free trials
- ▶ 500 total interactions target (likes, comments, shares)

TIKTOK

- ▶ Target: 2,000 followers
- ▶ Post frequency: Daily
- ▶ STEM tips & education trends content
- ▶ P2P learning insights & quick tutorials
- ▶ Use influencer following for outreach
- ▶ Visual success stories & impact highlights
- ▶ Participate in giveaways for free trials
- ▶ Convert 30-50 followers to inquiries/ambassadors

Business Plan & Market Analysis

Market Research · Competitor Analysis · Risk Assessment · Financial Projections · Customer Research

EXECUTIVE SUMMARY

The Problem

Only 31% of 8th graders score proficient in science (NAEP 2024). Achievement gaps in STEM start in middle school and widen without intervention.

Our Solution

AI-powered P2P tutoring app matching middle schoolers (6th+) with high school tutors (9th+) in the same district for on-demand STEM sessions.

Target Market

US K-12 schools, parents, and students in the EdTech space. Initial MVP focus on Northeast and Mid-Atlantic school districts.

Revenue Model

School subscription tiers + premium student access. High schoolers earn volunteer hours or financial compensation as tutors.

The EdTech Opportunity

Key Trends Driving Demand

- ▶ Post-pandemic learning loss has widened STEM achievement gaps — lowest-performing students saw losses 70% larger between 2022-2024
- ▶ EdTech adoption accelerated by schools seeking scalable, cost-effective intervention tools outside the classroom
- ▶ Near-peer mentorship programs show measurably stronger retention and engagement than traditional tutoring formats
- ▶ Teen-driven social platforms (TikTok, Instagram) signal high comfort with digital peer-to-peer learning environments

TARGET AUDIENCE PERSONAS

A

Alex, 13

The Student (Tutee)

Demographics

Middle schooler, Grade 7, struggling in math & science

Pain Points

Falls behind in class, embarrassed to ask teacher for help, parents can't afford private tutors

Goal

Catch up to peers, feel confident in STEM, improve grades

J

Jordan, 16

The Tutor

Demographics

High schooler, Grade 10, strong in STEM subjects

Pain Points

Needs volunteer hours for college apps, wants income, limited flexible work options

Goal

Earn compensation or hours, build leadership skills, give back

M

Ms. Rivera

The School Admin

Demographics

Middle school principal, Title I district, limited budget

Pain Points

Achievement gaps worsening post-pandemic, no scalable peer support tool

Goal

Low-cost intervention that works, easy to monitor, safe for students

COMPETITOR ANALYSIS MATRIX

VALUE PROPOSITION & PRICING MODEL

Why Tutterra Wins

 Only P2P teen-to-teen platform: relatable, trusted, effective

 AI matching ensures quality pairings within same school district

 School-integrated: districts can monitor sessions and outcomes

 Dual incentive: tutors earn pay or volunteer hours for college apps

 Safe, monitored environment built specifically for minors

Pricing Tiers

Free

RISK ASSESSMENT MATRIX

Risk	Category	Likelihood	Impact	Mitigation Strategy
Child Safety / Platform Misuse	Operational	Low	HIGH	Number 1 Priority: AI moderation, parental consent flow, admin oversight, session recording for audit
School District Adoption Barriers	Market	High	HIGH	Offer free pilot programs, align with district IT requirements, provide ROI case studies
Tutor Quality / Consistency	Product	Medium	Medium	Tutor onboarding training, rating system, AI performance monitoring, flagging system
Regulatory / COPPA Compliance	Legal	Low	HIGH	Legal counsel engaged early, parental consent at signup, data minimization policies
Competitor Response (Khan, Chegg)	Competitive	High	Medium	Differentiate on P2P teen model — not replicable by adult-staffed competitors quickly
Tutor Retention / Churn	Operational	Medium	Medium	Gamification, leaderboards, meaningful compensation, college rec letter incentives

3-Year Revenue Forecast

	Year 1	Year 2	Year 3
Schools (Basic)	10	40	120
Schools (Pro)	2	15	55
Monthly Revenue	\$2,580	\$10,785	\$36,925
Annual Revenue	\$30,960	\$129,420	\$443,100
Gross Margin (est.)	~65%	~70%	~75%

Assumptions: School subscription model. Excludes grant funding. Projections based on comparable EdTech early-stage SaaS benchmarks.

SWOT ANALYSIS

INTERNAL

STRENGTHS

- ▶ Only P2P teen-to-teen tutoring platform on the market
- ▶ Dual incentive model (volunteer hours + pay) drives tutor supply
- ▶ AI-powered matching keeps session quality high
- ▶ School-integrated — safety and monitoring built in from day one

EXTERNAL

WEAKNESSES

- ▶ Unproven platform — no large-scale user base yet
- ▶ Dependent on school district adoption for growth
- ▶ Tutor quality may vary without rigorous onboarding

SWOT

OPPORTUNITIES

- ▶ Post-pandemic STEM gap creates urgent demand for solutions
- ▶ \$142B global EdTech market growing rapidly year over year
- ▶ Title I federal funding available for qualifying districts
- ▶ Teen social media behavior aligns naturally with P2P learning

THREATS

- ▶ Established competitors (Khan, Chegg) have scale and brand
- ▶ School procurement cycles are long and budget-driven
- ▶ Regulatory risk if child safety standards aren't met early
- ▶ Platform misuse risk — teens interacting unsupervised online

PORTER'S FIVE FORCES · TUTTERRA

BARGAINING POWER OF BUYERS

HIGH

Schools have strong negotiating power — budget cycles are long, procurement is competitive, and switching costs are low early on. Tutterra must demonstrate ROI quickly to retain accounts.

THREAT OF NEW ENTRANTS

HIGH

Low capital barrier to build an ed-app. First-mover advantage and school relationships are key moats.

BARGAINING POWER OF SUPPLIERS

LOW

Tutors (high schoolers) have low leverage — large pool of candidates, motivated by volunteer hours/pay, and easily replaceable. Tutterra controls matching and session terms.

COMPETITIVE RIVALRY

MEDIUM

Khan, Chegg, Wyzant compete but none offer true P2P teen tutoring — Tutterra's core moat.

THREAT OF SUBSTITUTES

MEDIUM

YouTube, free apps, school programs substitute — but none combine P2P + safety monitoring.

THANK YOU

Tutterra's Vision

Increase graduation rates through P2P interactions.
Close STEM achievement gaps in schools nationwide.
Create a safe, organized, and encouraging learning environment.
